

Submission Instructions

Submission of Consultation Materials to Pathology Associates Services

Case materials can be most easily submitted with the Pathology Associates Services standard form. If your laboratory is not already supplied with these, you can print a copy from our website at www.pascharlotte.com. Information from the submitting pathologist can be included on the bottom portion of the form, or in a letter of enclosure.

Slide and block consultations should be shipped to our laboratory for the most effective accessioning.

Pathology Associates Services
101 East W.T. Harris Blvd
Suite 1212
Charlotte, NC 28262

Client billing will be initiated.

Specimens containing frozen tissue (on dry ice) or blood specimens being sent for flow cytometry analysis (on wet ice) should not be sent on Friday or Saturday in order to ensure that these specimens are received during office hours at our laboratory. Wet tissue should be shipped to:

Carolinas Medical Center—Mercy
Attn: Histology Department
2001 Vail Avenue
Charlotte, NC 28207

Specimens for flow cytometry should be sent to:

Carolinas Medical Center—Mercy
Attn: Flow Cytometry Laboratory
2001 Vail Avenue
Charlotte, NC 28207

As soon as cases are completed the consultative letter is faxed to the submitting pathologist. Any special stains performed in the consultative lab are returned to the sender with original slides and paraffin blocks.
